About This Game

September DDS update Price Down 50% !!
[NEW] Shop & Workbench

About 85 new drone components were added.
Now, various racing drones can be built, ranging from 3 to 8 inches in size.

[NEW] Course Editor

DDS Course Editor now offers:

- Course customizing in all the five existing maps
- Tips and tools to help build your custom course easily
 - Top and Perspective view
 - Course Path drawing using splines

Place spline points in Top view.
Edit spline points in Perspective view.
Build gates, flags and other objects in Perspective view.

Tips to make course customizing easy:

1. Move along the Spline

Make a new gate to follow the spline course path by clicking "Move along the Spline" button just before selecting the gate to place.

Use Q or E to move along the spline.

2. Snap shot

Make an object stick or 'snap' to the floor by using 'Snap shot' (spacebar)

3. Ctrl + Number(1,2,3,...0)

For bigger courses, save the current position of the camera by pressing CTRL+Number(1,2,3,...0). Go back to the saved positions by pressing the numbers used.

4. Wall Gates

Wall Gates can stick to almost anything, to allow easier placement of gates in areas with low ceilings (e.g. in factory or parking lot).

DDS is a First and Third Person Drone Racing Simulator designed to enhance your racing drone flying skills.

You can fly various racing drones in different maps in a First or Third person view.

Build drones in this detailed and highly realistic simulator and experience a whole new racing drone experience.

You can even make your own courses.

Game Play

- **Shop & Workbench**

Build your own drone by purchasing and collecting drone parts like frames, FCs, motors, ESCs, batteries, antennas, propellers or cameras.

- **D.I.Y Drone**

Learn how to build a racing drone with this interactive tutorial.

- **Fly**

Enjoy racing with your self-made drones and break your high score.

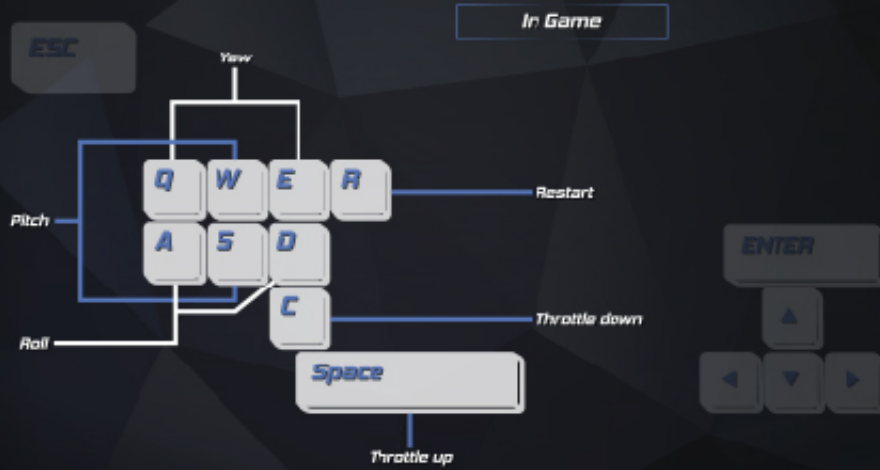

- **Course Cusomizing**

Place spline points in Top view and then edit spline points in Perspective view.

Build gates, flags and other objects !

Keyboard **CONTROLS**
